

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

**Listing of Claims:**

Claim 1 (previously presented). A disposable absorbent article comprising:  
an absorbent core,  
a liquid pervious topsheet, and  
a liquid impervious backsheet, said liquid pervious topsheet and said liquid impervious backsheet being positioned on respective opposite sides of said absorbent core,  
said liquid impervious backsheet comprising a nonwoven compound fabric, wherein  
said nonwoven compound fabric comprises a nano-denier nonwoven fabric barrier layer comprising a plurality of continuous thermoplastic filaments having a denier of less than about 1000 nanometers, a secondary barrier layer, and a nonwoven fabric substrate layer.

Claim 2 (previously presented). A disposable absorbent article, comprising:  
an absorbent core,  
a liquid pervious topsheet,  
a liquid impervious backsheet, said liquid pervious topsheet and said liquid impervious backsheet being positioned on respective opposite sides of said absorbent core, and  
a liquid impervious leg cuff,  
said liquid impervious backsheet comprising a nonwoven compound fabric, and

said nonwoven compound fabric comprises a nano-denier barrier layer comprising a plurality of continuous thermoplastic filaments having a denier of less than about 1000 nanometers, a second barrier layer, and a nonwoven fabric substrate layer.

Claim 3 (currently amended). A disposable absorbent article, comprising:  
an absorbent core,  
a liquid pervious topsheet,  
a liquid impervious backsheet, said liquid pervious topsheet and said liquid impervious backsheet being positioned on respective opposite sides of said absorbent core, and  
a liquid impervious leg cuff,  
said liquid impervious leg cuff and said liquid impervious backsheet each comprising a nonwoven compound fabric, wherein

said nonwoven compound fabric comprises a nano-denier nonwoven fabric barrier layer comprising a plurality of continuous thermoplastic filaments having a denier of less than about 1000 nanometers, a secondary barrier[,] layer, and a nonwoven fabric substrate layer.

Claim 4 (previously presented). A disposable absorbent article in accordance with claim 1, wherein:

said secondary barrier layer comprises a breathable film.

Claim 5 (presently presented). A disposable absorbent article in accordance with claim 2, wherein:

said secondary barrier layer comprises a breathable film.
